

## Creating a Custom Quilt from Scratch

There are just four basic steps to complete in collaboration with Rita of Heaven's Quilts before we can get your quilt project underway:

- **STEP 1** - Select a quilt pattern you like, or let Rita design one for you
- **STEP 2** - Determine quilt size, fabric and thread (types and colors), and the desired quilting style in collaboration with Rita. If you are not sure about what fabrics, colors and threads go well together, Rita can help you decide by drawing on her many years of experience working with all types of quilts.
- **STEP 3** - Agree on the cost estimate and a project schedule
- **STEP 4** - Establish a contract, pay a deposit (50% down), and your quilt is ready to be made! Get more information regarding contract requirements on our [Services](#) web-page.

The following information provides some basic guidance on the factors that can affect the price of a quilt:

- **PATTERN CHOICE** - Quilts may be made from any available pattern; to comply with copyright laws and regulations, a commercially available pattern or a pattern published in a book must be purchased (or provided if you have already purchased the pattern) with each custom made quilt.
- **QUILT MATERIALS** - The cost for fabrics and materials, including threads and batting, vary with pattern type and desired quilt size. Project pricing includes all material costs and labor for piecing the quilt top.
- **MACHINE QUILTING** - The project cost includes all labor for machine quilting and binding. The total cost will depend on the complexity of the pattern. Get more information on machine quilting options on our [Services](#) webpage.
- **SPECIAL REQUIREMENTS** - Requests for special techniques, unique threads or embellishments will be added to the project cost. We can discuss with you the various options available.
